### To Our Customers & Partners:

INCOM Egypt has undergone significant changes in the past five years in pursuit of our vision to become a global leader in the market. By manufacturing high-value products with an emphasis on incomparable quality and standards compliance, we have created a strong presence in our industry. Heavy investment in state-of-the-art machinery is enabling us to meet existing and forecasted production requirements while incorporating future growth plans. These efforts have resulted in steady facility expansions and development of our product range for the wires & cables division, wire harness division, injection division and PVC compounds manufacturing plant. In addition to these business units, we have recently increased production capacity in the plug insert factory and our customized plastic molding section.

Our goal is to be among the most sustainable companies in our industry, with close links between our quality of material, pricing, brand value, and our Group's business strategies. Much work remains to be done before we achieve our goals, but it is a realistic objective considering the progress that INCOM Egypt has already made. Personally, I believe that sustainability aspects must be integrated into everything we do, and this is important to INCOM Egypt's long-term success.

Together with the support and strong integration between INCOM Egypt and its sister companies, under A.G. SINGER & CO., I believe we can aspire to achieve our vision and become a market global leader in a variety of industries.

I would like to personally thank all of our customers and our long-standing partners for entrusting us with their business requirements and giving us the opportunities to expand and strengthen our Group as a whole.

Sincerely,

A.G. Singer Chairman

INCOM America, Inc. (a member of the A.G Singer & Co. Group of Companies) was established in 1994 in New Jersey, USA and specialized in the manufacturing of electric power supplies serving both the local and international markets. Due to the market demand in the Middle East and Gulf States, INCOM America, Inc. expanded it facilities to Alexandria, Egypt.

In 2002, INCOM Egypt, a subsidiary of INCOM America, Inc., was established in the Free Zone of Alexandria, Egypt. By 2004, we introduced our largest division for electrical wires & cables, followed by our wire harness assemblies division, our power supply cords division, our plug inserts division and our injection molding division.

INCOM Egypt manufactures its products according to the quality guidelines set forth by ISO 9001, OHSAS 18001 and to international standards authorities such as the Underwriters Laboratories (UL), CSA, SASO, IEC, DEKRA and VDE (including customized customer specifications). To ensure our full compliance, INCOM Egypt undergoes the strictest periodic inspection by these external authorities.

The most recent addition to the A.G. Singer & Co. Group of Companies is the development of SACOM INDUSTRIES (INCOM Egypt's sister company) that specializes in PVC Compound, electrical wire insulation, sheathing/jacketing and molding injection.

INCOM Egypt & SACOM INDUSTRIES provide a wide range of products including electrical wires and cables, electrical conductors, electrical harnesses, power supply cords, plug inserts, PVC Compound and plastic spools & custom plastics projects. Our commitment to excellence and exceptional quality is driven by our continuous desire to follow professional business practices and surpass the highest manufacturing standards and guidelines available.

### **Our Vision**

We aspire to be a global leader in the market with a complete product range that offers incomparable quality and value.

### **Our Mission**

To provide outstanding quality and services to our customers at competitive prices, while continually supporting our partners and developing our team through continuous education and application of new technologies.

SINGER

Q

Our holding company, A.G. SINGER & CO., is a global leader in Freight Forwarding & Shipping, International Trade, Transportation, Import/Export, Manufacturing of Electric Power Supplies, PVC Compound and Food Distribution.

A.G. SINGER & CO. started with a small list of subsidiary companies that were initially established to support and provide services to one another, and then quickly grew to establish manufacturing facilities in different sectors outside of the freight forwarding & shipping industry.

## A. G. Singer & Co. Group of Companies

### **GULF AMERICAN LINE: (GAL)**

Gulf American Line is one of the largest NVOCCs (Non-Vessel Operating Common Carrier) to the Middle East, Gulf States and the Mediterranean with many offices and warehouses in most major cities in the United States. In addition, we have expanded our markets to Eastern/Western Europe and Asia and have built a worldwide network of offices and agents. Headquartered in New Jersey, GAL has offices and warehouses/distribution facilities based in New Jersey, Virginia, and North Carolina to manage and support Global Customer Accounts & Requirements.

### **NEW YORK FORWARDING SERVICES, INC.: (NYFS)**

New York Forwarding Services, Inc. is a freight forwarding company, established over 35 years ago, and handles all of our Import & Export commercial and military AIR shipments. Its headquarters is also in New Jersey, and has offices and warehouses/distribution facilities based in New Jersey, Virginia, and North Carolina.

### **WORLD TRADE VENTURE, INC.**

This is one of the first companies established, in 1979, and is a key service provider to both NYFS and GAL as it handles international Imports / Exports to and from the United States.

# .G. SINGER & CO.

### THE MARITIME COMPANY FOR NAVIGATION USA, INC.: (MTCN)

The Maritime Company for Navigation is the designated freight forwarder for Ministries of Defense projects and handles exports and imports (for repair and return) destined to and from the United States and CANADA, whether through Foreign Military Sales Program or commercial suppliers. MTCN has all of the required licenses and clearances in the USA to handle all types of cargo (Hazardous, explosives and classified Material up to level secret).

### CONSOLIDATED FREIGHT EXPRESS, LLC

A company that handles Inbound & Outbound inland transportation throughout the United States and is also a key service provider to NYFS, MTCN and GAL. It owns and operates its fleet of trucks to ensure deliveries to the ports and airports. Also, its drivers are TSA approved to handle classified military freight and TWIC approved to carry cargo requiring special handling to regular container loads across state borders.

### **WORLD FARMS**

A food and beverage distributer serving export markets from the fertile farms of Egypt. All products are processed under a strict quality control process in accordance with the international quality standards. Our care, commitment and consistency to the finest quality standards has earned us the approval of the FDA, which is known to be one of the strictest food association that is responsible for monitoring and testing all food imports into the USA. When entering new markets, we make sure to thoroughly investigate and implement the necessary regulations and certifications required by each country.

### **INCOM AMERICA, INC.**

INCOM America was established in 1995 as a manufacturing facility that produces electric power supplies such as wires & cables, electrical conductors, wire harness assembly, power supply cords & plug inserts. It grew to become a key supplier serving both the local and international markets.

### **INCOM TRADING**

An Egyptian based company that handles Imports / Exports to and from Egypt and is a key service provider to its sister companies based in Egypt.

Ш

N N

C

### **INCOM EGYPT**

In 2002, INCOM AMERICA expanded its facilities from the United States to Egypt and introduced our largest division for electrical wires, cables and power supplies. INCOM EGYPT, a subsidiary of Incom America Inc. and based in the Amreya Free Zone in Alexandria, Egypt, manufactures according to the highest international standards authorities such as Underwriters Laboratories (UL), CSA, SASO, IEC, BS, DEKRA and VDE (including customized customer specifications).

### **SACOM INDUSTRIES**

Our latest development is our PVC Factory, SACOM INDUSTRIES, which is also located in the Amreya Free Zone in Alexandria, Egypt. It produces PVC Compound, electrical wire insulation, sheathing/jacketing, molding injection, plastic spools & custom plastics projects.
