LIGHT INDUSTRY

SHYMKENTCEMENT

SHYMKENTCEMENT HEIDEL RERGCEMENT Group

ABOUT THE COMPANY

The Shymkentcement JSC plant, located in the city of Shymkent, South Kazakhstan region, was founded in 1958. Since 2016, the plant has been a part of the Heidelberg Materials Kazakhstan group of companies, a world leader in the production of construction materials. The plant employs over 340 people. Production capacity 1.3 million tons of cement per year.

PRODUCT DESCRIPTION

Cement M600 for concrete classes up to B80 (M1000)

Cement M500 For concrete classes up to B60 (M800)

Sulfate-resistant cement M500 for concrete classes up to B60 (M800)

Cement M450 for concrete classes up to B35 (M450)

Cement M400 60x60 cm

COMPETITIVE ADVANTAGES

Product quality meets GOST standards

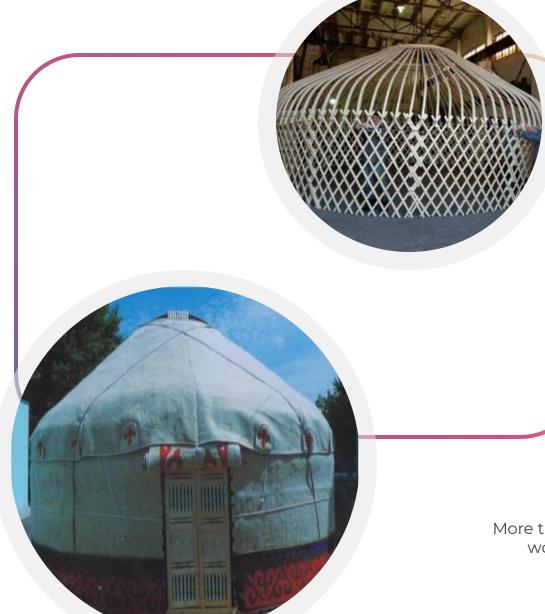

Product quality control at each stage of production for compliance with all technical requirements

Delivery of cement to the client's address

INDIVIDUAL ENTREPRENEURSHIP KAYSAR AND CO

ABOUT THE COMPANY

Kaisar & Co. has been producing and selling national handmade yurts for **more than 20 years**. The company successfully operates in the local market and plans to expand the geography of exports.

Production capacity: 6-7 yurts per month.

PRODUCT DESCRIPTION

The Company offers different national yurts sizes:

- 6 wings
- 8 wings
- 12 wings
- 16 wings

COMPETITIVE ADVANTAGES

More than 20 years of work experience.

Unique and authentic handmade product.

TM GREENCOR

Greencor

ABOUT THE COMPANY

The company presents gypsum metal products for clean rooms according to international standards. The scope of application of the products is quite extensive - clean rooms are needed in many industries, such as medical institutions, pharmaceutical production, research laboratories, and the food industry.

PRODUCT DESCRIPTION

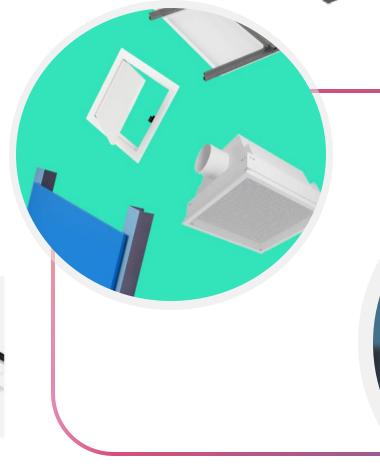

Wall structures: Designed to solve problems of internal wall cladding in clean rooms

Wall structures: Designed to solve the problem of minimizing sharp angles in clean rooms

Ceiling structures: solve the problems of internal cladding of ceilings in clean rooms

COMPETITIVE ADVANTAGES

The product quality meets European standards at a market-competitive price;

Product quality control at each stage of production for compliance with all technical requirements

GENENOTE

ABOUT THE COMPANY

GeneNote LLP develops and produces reagent kits for research work, offers test systems for molecular genetic research in the field of monogenic and multifactorial hereditary diseases, oncology and prenatal diagnostics.

SERVICE DESCRIPTION

The Genenote company is engaged in the development and production of test systems for molecular genetics in the following areas:

- non-invasive genetic prenatal diagnosis; · diagnostics in oncology
- determination of indications for targeted therapy
- kits for isolating nucleic acids from various sources
 - development of custom genotyping kits

The company has an ISO 13485:2016 certified production laboratory equipped with the necessary equipment for the production of kits and quality control.

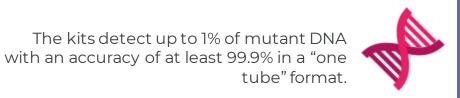

PCR kits followed by

electrophoresis are easy to use and do not require expensive equipment.

COMPETITIVE ADVANTAGES

TROYA

TROMA

ABOUT THE COMPANY

The company has been operating in the domestic production market of office and laboratory furniture since 2011. Provides a full range of services for equipping office premises with new, innovative furniture, which is made from high-quality, durable materials.

PRODUCT DESCRIPTION

The Company's products consist of many types of furniture for office and educational premises

«FORTUNA SEWING FACTORY» LLP

O P. T. V. B.

ABOUT THE COMPANY

«Fortuna Sewing Factory» LLP is one of the most popular enterprises in Kazakhstan in the field of services for providing specialized professional clothing; the company was founded in 2000.

PRODUCT DESCRIPTION

Size	from 40-42 to 62-64
Materials	Overalls are made from special materials that provide the necessary protection. These can be fire-resistant materials, chemical-resistant, antistatic materials, etc.
Lifetime	Due to the special materials and design, the overalls must be durable and withstand long-term use.
Compliance	The workwear meets the requirements and safety standards of various industries, including safety regulations and comments from chief engineers. However, additional security measures are possible to implement.
Service	Depending on the conditions of use, workwear can be easily washed and maintained.

COMPETITIVE ADVANTAGES

The company's products comply with the quality standards of the Eurasian Economic Union

Compliance with ISO 9001:2015 and ISO 14001:2015 standards

ECO PHARM

ABOUT THE COMPANY

Manufacturer of high-tech express tests in the medical and pharmaceutical market in the Republic of Kazakhstan. Company works with modern foreign equipment from Japan and Korea. Express tests are made using new technologies and meet all the required parameters.

PRODUCT DESCRIPTION

Express tests to determine:

- Hepatitis C and Hepatitis B
- Infections: Tuberculosis, Syphilis, Immunodeficiency
- Cardiac markers: cardiac troponin test
- Cancer
- Drug tests
- COVID-19 tests

COMPETITIVE ADVANTAGES

Quick and easy to use tests, 97-99.8% reliability of results.

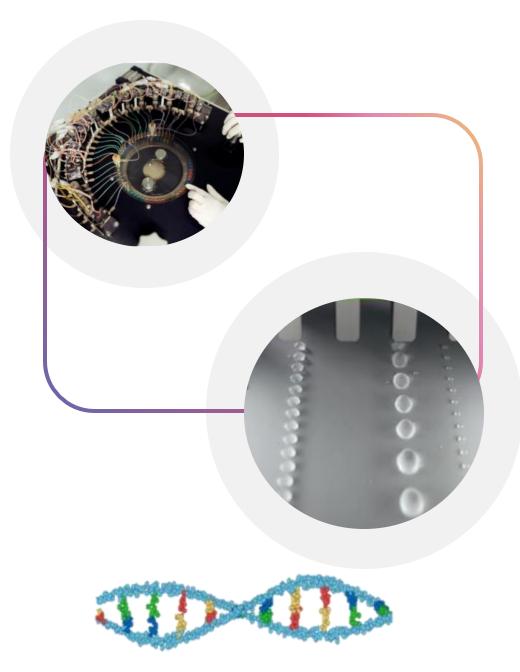

Research is carried out using various biomaterials.

ALLGENE

ABOUT THE COMPANY

AllGene provides essential services for laboratories and manufacturers working in the fields of molecular biology, PCR diagnostics, medical genetics and many related fields. Company performs oligonucleotide synthesis and Sanger sequencing on the most modern equipment using special reagents from leading manufacturers - ThermoFisher Sci, Merck Life science, Avantor, etc.

SERVICE DESCRIPTION

Oligonucleotides are used to solve problems in molecular biological research, including sequencing, PCR, gene therapy and other genetic research, disease diagnosis, protein synthesis and others.

Number of nucleotides: From 5 nucleotides to 150 per oligonucleotide

Service life: Due to the special materials and design, the overalls must be durable and withstand long-term use.

Areas of application: Suitable for a wide range of applications from routine PCR to engineering synthetic genes, recombinant constructs or adapters for NGS libraries

Storage oligonucleotides: For long-term storage or long-term transportation of oligonucleotides lyophilization is recommended. In this state at a temperature of -20 °C oligonucleotides can be stored for several years, at room temperature from several months to several years.

COMPETITIVE ADVANTAGES

. Quality control is carried out by various modern methods including CE, HPLC.

Modern equipment using special reagents from leading manufacturers - ThermoFisher Sci, Merck Life science, Avantor, etc.

The constantly replenished instrument fleet makes it possible to both improve quality control and expand the list of services.

IP «DZHANGAZIEVA Z.N.»

The products of the clothing store "Adili Textiles" represent exceptional models and styles for the whole family.

The range includes fashionable and quality clothes for men, women and children. Special attention to detail is paid and only the best materials are used to ensure comfort.

The clothing covers a variety of styles, from casual wear to evening wear, allowing everyone to find something to suit their taste and preferences.

COMPETITIVE ADVANTAGES

Quality control at every stage of production

An optimized sewing process allows to quickly fulfill orders

Export to CIS countries

MECHANICAL ENGINEERING INDUSTRY

ADELE ENERGY

ADELE

ABOUT THE COMPANY

The company has gained experience in designing electric vehicle charging stations and invested all knowledge and skills in creating a new, unique product lineup.

The development center constantly works on the introduction of unique and modern technologies, making company's products more ergonomic, intuitive, with a pleasant design for perception.

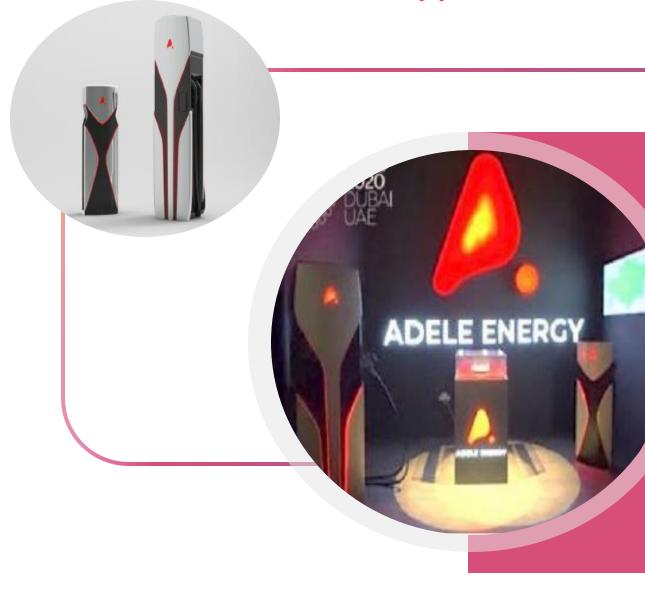

PRODUCT DESCRIPTION

- **The Foton DC** charging station is designed for fast and convenient charging of all electric vehicle models.
- Storage temperature: -40 C to +60 C
- Operating temperature: -30 C to +50 C
- **Dimensions:** 1800 x 600 x 450 mm
- Weight: up to 190 kg
- CPMS Connection Protocol: Open Charge Point Protocol
- Network interface: Ethernet, WiFi, 4G LTE (Optional)
- Standards: IEC61851, IEC62196, IEC62763, SAEJ1772, ISO15118 / DIN70121 National Standards
- Power consumption: 3-phase AC, 50/60Hz

COMPETITIVE ADVANTAGES

Competitive price, Availability of own software, vandal-proof housing, remote access

European technologies and certified products according to global standards.

SILUMIN - VOSTOK

С» Силумин-восток

ABOUT THE COMPANY

The production and engineering company "Silumin-Vostok" (headquartered in Ust-Kamenogorsk), founded in 1996, occupies a leading position in Kazakhstan in the field of industrial automation, power supply, integrated project development and supply of equipment for various industrial sectors.

PRODUCT DESCRIPTION

The presence of a powerful production base, which includes a modern metalworking area, allows to offer the customer a wide range of products at competitive prices:

- Low-voltage switchgears (LVDS) 0.4 kV;
- Complete switchgears (KRU) 6-24 kV;
- Dry transformers with cast insulation with power up to 3150 kVA and voltage up to 35 kV;
- Pumps and pumping stations for industrial use;
- Shut-off and control valves;
- Block-modular buildings;
- Complete transformer substations up to 35 kV;
- Block heating points;
- Electromagnetic flow meters SMF;
- Industrial refrigeration equipment: chillers, refrigeration machines (split systems), compressor and condenser units, etc.;
- Block-modular compressor stations.

COMPETITIVE ADVANTAGES

The company is certified for compliance with the requirements of the following standards: ISO 9001:2004 – Quality management system OHSAS 18001:2007 – Occupational safety system ISO 14000:2004 – Environmental management system

More than 60 regular customers in Kazakhstan and abroad

«GSCO POWER» LLP

SSC0

ABOUT THE COMPANY

General Supply Company is one of the large suppliers of diesel generators, transformer substations, high-voltage cells and ventilation equipment in Kazakhstan. The company purchases foreign engines and assembles them into generators under its own brands - GSCO and Edison

PRODUCT DESCRIPTION

The company produces the following types of generators:

- •Cummins 50Hz or 60Hz
- •Perkins 50 Hz or 60 Hz
- •Yuchai 50Hz or 60Hz
- •Ricardo 50 Hz
- •Deutz 50 Hz
- •Doosan 50Hz or 60Hz

COMPETITIVE ADVANTAGES

European technologies and certified products according to international standards

Up to 2000 kW total product power

REIMS INDUSTRY

ABOUT THE COMPANY

Reims Industry is a start-up company specializing in the production of lithium iron phosphate (LifePo4) batteries

PRODUCT DESCRIPTION

Usage Purpose

Designed for use in uninterruptible power supply systems, backup power supply, autonomous solar systems, electric transport, electric motors, camping and motorhomes

Technical Description

Protection degree IP21-IP23, Voltage, V 400/230,3 phases, digital control panel based on microprocessor controller

Color

Black body (can be customized according to customer's request)

COMPETITIVE ADVANTAGES

Long service life, Chemical and thermal stability

High energy capacity and a large number of recharge cycles, on 50% more than lithium-ion

SUNCAR MS

ABOUT THE COMPANY

- SUNCAR MS company majors in the production of vehicle tracking devices TC-AIG-V8 GPS on the territory of the Republic of Kazakhstan.
- SUNCAR MS is the first company in Kazakhstan to manufacture domestic telematics devices that are customized for the needs of business and the country.

PRODUCT DESCRIPTION

- The TC-AIG-V8 GPS vehicle tracking device is designed to track the location of any types of vehicles, as well as receive data from connected sensors and transmit information to the SUNCAR MS server complex.
- The device is suitable for monitoring any vehicle fleet, regardless of its size.
- This model consists of the most popular functions: a built-in CAN reader, buzzer, accelerometer and additional connectors for connecting sensors.
- To exchange data with the server complex, the specialized SUNCAR MS software is used.

COMPETITIVE ADVANTAGES

Lifetime warranty on all equipment Local 24/7 support services The best balance for price and quality

The requirements for functionality and accuracy comply with best world standards and practices

«KAZARMAPROM» LLP

ABOUT THE COMPANY

KazArmaprom LLP is the oldest enterprise not only in the West Kazakhstan region, but also in the Republic of Kazakhstan. In 2007 it turned 94 years old. During this period, it went from a small private mechanical workshop to a large enterprise. The company is one of the leading manufacturers of shut-off valves made of gray cast iron in the Republic of Kazakhstan.

PRODUCT DESCRIPTION

KazArmaprom LLP serially produces grinding balls with a diameter from 40 to 100 mm according to ST 7543-1926-TOO-154-013-2012. The grinding ball is used at mining and processing plants to grind ore.

- Height 13800mm
- Diameter 1100mm

Capacity – 15 tons/hour

The finished balls are sent to the finished product warehouse for further loading into wagons and dispatch

COMPETITIVE ADVANTAGES

The finished balls are sent to the finished product warehouse for further loading into wagons and dispatch

Products are subject to quality control at all stages of production, which completely eliminates the possibility of receiving defective products

CARBOGEO

ABOUT THE COMPANY

The only manufacturing company in the country working in the field of diamond drilling. The company's mission is to conduct scientific and technical activities for the production of diamond drilling equipment. Founded in 1998 in the city of Ust-Kamenogorsk.

An exploration drill bit is a special tool used in drilling operations to explore the geological structure of the earth's crust. It is a metal or diamond element attached to the end of a drill pipe or borehole.

Categories of tools according to degree of hardness

- **VI-VIII** This category includes softer and medium-sized rocks dense limestones, dolomites, marls, limonites
- VIII-IX These categories include medium and fairly strong rocks: coarse-grained granites, diorites, dunites, liparites, basalts
- X-XII Strong and very strong rocks quartzites, vein quartz, dense granite and granite rocks, very strong sandstones and limestones, quartz ore veins

COMPETITIVE ADVANTAGES

Product quality control at each stage of production for compliance with all technical requirements

Reliable suppliers of high-quality component materials from the Russian Federation and Kazakhstan

alageum «PETROPAVLOVSK ELECTROTECHNICAL PLANT» LLP

ABOUT THE COMPANY

Alageum Electric is a large electrical engineering company in Kazakhstan, which includes more than 30 large enterprises and factories successfully operating in the field of electric power, electrical engineering and construction. Company is a part of the group of companies "Alageum electric".

PRODUCT DESCRIPTION

Oil transformers (distribution) 10 kV -TM, TMG, TMGSU, TMZ, etc.

Dry transformers (distribution) 6-10 kV -TSL, TSN

Oil transformers (power) 35-500 kV -TMN, TD, TDNS, TRDNS, TRDN, TDTNSH, TDTN, TMTN, etc.

Reactors 110, 220, 500 kV

Transformers for railway 27.5 kV - OM, OMZH, ZOM, TMZH

Current and voltage measuring transformers – TOL, TPL, TPOL, ZNOL, NOL, ZNOLP, NOM, NTMI, NAMIT, NAMI Disconnectors RGP, RV, RVZ, RVFZ

COMPETITIVE ADVANTAGES

Compliance with quality standards of the Eurasian Economic Union

Products are created according to the needs of operating organizations, industry specifics, climatic and technical operating conditions.

Has experience in exporting equipment to CIS countries

CHEMICAL INDUSTRY

TEMIR SERVICE

TEMIR SERVICE

ABOUT THE COMPANY

Temir-Service LLP offers for sale phosphate rock, a long-acting phosphorus mineral fertilizer containing the active substance P2O5 of at least 17%, with delivery to any point, both within the territory of the Republic of Kazakhstan and abroad. Form of delivery of phosphate: in bulk form in mineral wagons, packaged in bags (50 kg), in soft containers (bigbag) of 500 kg or 1000 kg.

PRODUCT DESCRIPTION

- Phosphate rock is produced by grinding of dry screened natural phosphates of Chilisai phosphate deposit. The deposit is located at the North-West Kazakhstan.
- THE CHILISAI PHOSPHATE ROCK IS RECOMMENDED FOR FOLLOWING CROPS:
- Cereals: Wheat, Barley, Rye, Oats, Buckwheat
- Oil Crops: Sunflower, flax, safflower, peanuts, soybeans, cotton
- Vegetable crops: Potatoes, tomatoes, carrots, sugar beets.
- Fruit crops: Apple tree, pear, cherry, sweet cherry
- Grounds: Watermelon, melon, pumpkin

COMPETITIVE ADVANTAGES

Prolonged action: Mobile phosphates are sustained in soil for up to 3 to 5 years after phosphate rock application.

Environmental safety.: The Chilisai Rock does not pollute the soil and ground water with substances toxic to plants and animals.

KAZAZOTJSC

ABOUT THE COMPANY

KazAzot JSC is Kazakhstan's vertically integrated national producer and exporter of ammonia and ammonium nitrate. The geography of the Company's **exports covers** almost the entire territory of the **CIS region, the Baltic and Eastern European countries.**The production capacity is up to **400,000 tons of products per year.**

PRODUCT DESCRIPTION

Ammonium nitrate is a micronutrient necessary for agricultural crops. In addition, ammonium nitrate is used for the leaching of uranium ores and the production of industrial explosives in the mining industry.

Physical Properties: granules of white color or slightly colored without mechanical impurities.

COMPETITIVE ADVANTAGES

The product has been awarded with certificates and diplomas in international and national competitions and exhibitions.

Export geography: almost the entire territory of the CIS region, the Baltic and Eastern European countries

The Company's products comply with ISO standards

KAZSTEPSERVICE

ABOUT THE COMPANY

In 2016, KazStepService LLP launched its own production of household chemicals, soaps and cosmetic products under the registered trademark "Step".

The product range is constantly being improved and today it includes about 12 types of products.

PRODUCT DESCRIPTION

The company's product range consists of liquid soap, detergents and liquid laundry soap:

- **Liquid soap** is suitable for hands, body, hair, since it has a composition similar to a shampoo.
- **Liquid laundry soap** "Step" is made on the basis of potassium salts, and therefore does not lose its properties and is not subject to "drying out".
- **"Step" detergent** effectively dissolves grease and dirt and is easily washed off with water.

COMPETITIVE ADVANTAGES

Certified by EAEU, ST KZ, industrial certificates

Modern equipment and high-quality raw materials

ABOUT THE COMPANY

The **VMP Astana** plant is the only unique high-tech production of modern industrial paint and varnish coatings at the European level in Kazakhstan. The produced materials are intended for long-term protection of metal and concrete that increase the level of safety of industrial and civil facilities.

PRODUCT DESCRIPTION

Anti-corrosion protection of metal

VMP coatings are technologically advanced, simple and easy to use materials that provide long-term protection of structures – more than 30 years. Most materials can be applied in a wide range of weather conditions, freezing temperatures or high humidity.

Anti-corrosion protection of concrete

To effectively protect concrete from corrosion, VMP suggests using anti-corrosion coatings consisting of a primer layer (which uses deep penetration materials) and one or two layers of topcoat enamels.

Fire retardants

Designed to increase the fire resistance of metal structures to 240 minutes. PLAMCOR® materials are represented by fire-retardant intumescent compositions and structural fire protection. The use of fire-retardant compounds with anti-corrosion primers allows the creation of coating systems that provide long-term protection against corrosion and fire.

Products are produced on modern technological lines, where the latest equipment and automation systems have been introduced.

COMPETITIVE ADVANTAGES

In cooperation, the company offers a flexible system of discounts and promotions.

LUKOIL

ABOUT THE COMPANY

LUKOIL Lubricants Central Asia sells lubricants in Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan, Mongolia, Afghanistan and China. Production capacity up to 100,000 tons of products per year.

PRODUCT DESCRIPTION

The company's product range consists of 23 different product categories, the main ones being:

- Retail line of motor oils for passenger cars
- Motor oils for commercial vehicles
- Oils for mechanical transmissions of commercial vehicles
- Fluids for automatic transmissions and power steering for commercial vehicles
- Oils for manual transmissions of passenger cars
- Fluids for automatic transmissions and power steering of passenger cars

COMPETITIVE ADVANTAGES

Certified by International standards ISO9001:2016

The laboratory is equipped with 75 units of laboratory equipment from leading manufacturers from the USA, Austria and Switzerland.

QAZBIOPHARM

ABOUT THE COMPANY

The Holding group of companies includes research institutes with more than 100 years of history and about 100 scientific laboratories of all levels of biological safety.

PRODUCT DESCRIPTION

More than 170 medical and 350 veterinary scientific developments:

2006: Vaccine "Kazakhstan-15" against avian influenza H5N1 for veterinary medicine.

2010: Split vaccine against seasonal influenza for humans, clinical trials conducted with the participation of WHO experts

2018: Vaccine against lumpy skin disease, used in veterinary

2019: Medicine new vector vaccine against bovine brucellosis

2020: QazVac is the first Kazakh vaccine against COVID-19

Certificate of compliance with

of pharmaceutical practices

in the field of circulation of

the requirements

medicines

2022: "Vaccine against Newcastle disease from the "La Sota" and "N" strains

COMPETITIVE ADVANTAGES

Up to 60 million doses production capacity. The Holding operates 13 scientific laboratories employing more than 250 people.

More than 70 types of vaccine biological products have been developed and introduced.

LKP ALRI

ЛКП АЛРИ

ABOUT THE COMPANY

LLP LKP "ALRI" is engaged in the production and sale of paints and varnishes. LCP ALRI was founded in 1998. The production capacity of the plant is from 15,000 kg per shift. The high quality of products manufactured under the ALRI brand is due to the use of modern production technologies, the latest equipment from the German company NETZSCH, the use of high-quality raw materials from leading foreign and domestic manufacturers, as well as highly qualified personnel.

PRODUCT DESCRIPTION

The company has been producing paints and varnishes for 20 vears!

- Enamels
- Primers
- Special purpose enamels
- Road marking paint
- Fire retardant materials
- Water-dispersion paints
- Solvents
- Detergents

COMPETITIVE ADVANTAGES

Certified by International standards ISO 9001-2016 (ISO 9001:2015)

The company guarantees that everything indicated on the labels corresponds to the quality of the products.

Provides free samples of paints and detergents for testing.

RGK-CASPILLP

ABOUT THE COMPANY

RGK-Kaspiy LLP produces extrusion geosynthetic materials. The company was created jointly with the leader on the Russian extrusion geosynthetic materials market, LLC RKG. Company has more than 10 years of experience in implementing projects in the field of construction of industrial and civil projects of various sizes.

PRODUCT DESCRIPTION

Products serve for corrosion protection, for the construction of lagoons and water tanks, storage facilities for hazardous and toxic substances - the scope of application is very large, and company is proud to declare that they are the leading geomembrane production company in the CIS.

COMPETITIVE ADVANTAGES

ISO Compliant

The company produces 28 types of extrusion geosynthetic materials: polypropylene and polyethylene flat geogrids, polyethylene volumetric geogrids, polypropylene geomats, geocomposites, etc.

AVIKS GROUP

ABOUT THE COMPANY

The AVIKS GROUP company has been successfully operating in the lubricants market in Kazakhstan since 2012. They produce a wide range of special and general-purpose lubricants, as well as industrial, motor and transmission oils. All products comply with norms and quality standards and are supplied to the largest industrial enterprises in Kazakhstan and trade organizations.

PRODUCT DESCRIPTION

The company's product range consists of many different lubricants. One of the company's products is Litol-24 lubricant (GOST GOST 21150-87)

- **Product description**: Petroleum oil with a viscosity of 60-75 mm2/s at 50°C, thickened with lithium soap 12- hydroxystearic acid; contains antioxidant and viscosity additives.
- Basic operational characteristics: High colloidal, chemical and mechanical stability, water resistant even in boiling water, does not harden when heated. Anti-corrosion, frost-resistant.
- Operating temperature: Operable at temperatures -40...+120°C, retains for a short time operability at temperatures outside the specified range.

Application area: Used to reduce friction between metal components, reducing the noise produced by mechanisms, reducing contamination and prevent overheating of parts.

COMPETITIVE ADVANTAGES

Certified by International standards ISO 9000/9001/9004/19011:2000

Extensive experience in the production of lubricants; Favorable geography and proximity to sales markets; Wide range of high-quality products.

KAZPHOSPHATE LLP

ABOUT THE COMPANY

Kazphosphate LLP is a unique company in Kazakhstan, which owns a full supply chain from production to transportation of phosphates using their own Railway Transport Complex. The main activities of the company are geological exploration, mining and processing of phosphate rock, production and sale of yellow phosphorus and its derivatives, phosphate mineral fertilizers and feed phosphates, production of industrial products based on mineral raw materials.

PRODUCT DESCRIPTION

Technical yellow phosphorus

Ammophos NP 10:46

Technical orthophosphoric acid

Sulfoammophos

Yellow technical purified phosphorus

Phosphogypsum

COMPETITIVE ADVANTAGES

Export experience: Russia, Belarus, Ukraine, Uzbekistan, Tajikistan, Turkmenistan, etc.

CRS LLP

aura of kazakhstan

ABOUT THE COMPANY

The first Kazakh perfume brand **Aura of Kazakhstan** was born out of love for the native land, its nature and history. The smells of mountains and steppes, large megacities and historical sites are the same cultural heritage of Kazakhstan as the objects of applied art, melodies, chants or traditions that have been passed down from generation to generation for centuries. The perfume compositions contain the genetic code of the great Steppe, its history and hopes for the future.

PRODUCT DESCRIPTION

- Highly qualified staff from France, UK and Spain
- The genetic code of the Great Steppe, its history and hopes for the future
- Innovation
- Wide range

COMPETITIVE ADVANTAGES

Own innovative development laboratory, as well as cooperation with laboratories abroad.

SERVICES

IMAS

ABOUT THE COMPANY

iMAS (Information Monitoring and Analysis System) - automated real-time monitoring of mass media channels and social networks, blogs, messengers, review sites, forums, any web resources as well television, press using the latest technologies to collect and process information. The system monitors in real time format 24/7/365 all mass media of Kazakhstan (4000+) and leading mass media of 150 countries (30 500+), as well as social networks.

SERVICE DESCRIPTION

TRACKING the image of your brand / company / leader. Carry out real time reputation audit, rapidly adjust your PR strategy.

EFFECTIVE MONITORING

Do not miss a single mention of your brand/company/key staff/products. Evaluate yourself in the media realm.

MEDIA THREATS, CRISIS SITUATIONS, RISKS

Identify reputation and information threats, criticism, negativity, disinformation. Promptly react to them by transforming negative into positive. Identify resonances and recessions in the media realm.

TRANSPARENT ANALYTICS

Analyze mention ability dynamics, divisions of sources, geographic coverage and other. Order ready-made reports or create them yourself in 2 clicks.

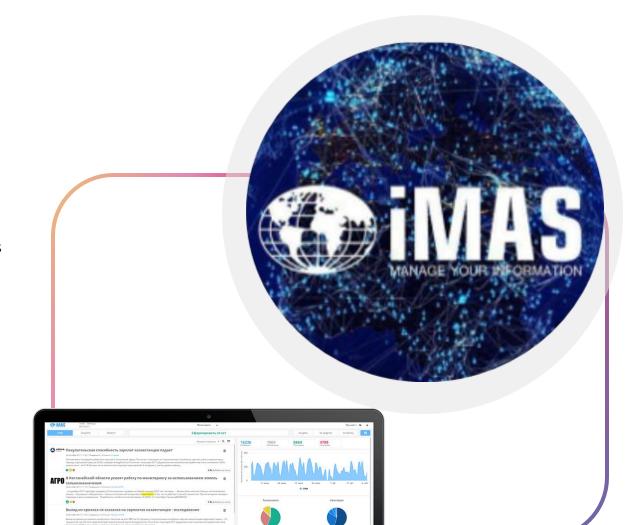

COMPETITIVE ADVANTAGES

Residents of Astana Hub – International Hub for IT startups

astana hub

community

The system is included in the National registry of trusted software of the Kazakhstan Association of IT companies

INSTITUTE OF HUMAN SAFETY

ABOUT THE COMPANY

Institute is one of the leading national developers in the field of human safety systems. They specialize in developing advanced risk management systems to ensure patient safety. The unique medical staff coordination systems are based on patented technologies that have no analogues. The company actively collaborate with regulatory authorities, industry experts and users to create products that are reliable and meet high safety standards.

SERVICE DESCRIPTION

The hardware and software complex "Medical System SOS" is an uninterrupted communication system for coordinating medical personnel in emergency and urgent cases.

SOS bracelets automatically detect a fall and send a signal to medical personnel.

Application for pregnant women - a hardware and software complex that allows you to monitor the condition of pregnant women and assess the risks of developing pathologies during pregnancy and the first years of a child's life

COMPETITIVE ADVANTAGES

The company is one of the leading domestic manufacturers in the field of patient safety risk management systems.

PLATONUS

ABOUT THE COMPANY

The company offers ready-made products for automating the educational process, making it modern, interesting and convenient in organizations of higher and postgraduate education, as well as technical and vocational secondary education

SERVICE DESCRIPTION

- **PLATONUS MEDICAL:** plan and automate the educational process in higher educational institutions with a medical profile in accordance with the standards of credit education technology.
- **PLATONUS COLLEGE:** automate the learning process in Technical and Vocational education organizations.
- PLATONUS UNIVERSITY: automate the educational process of higher educational institutions in accordance with the standards of credit education technology.
- USUVO (UNIFIED MANAGEMENT SYSTEM FOR HIGHER EDUCATION): multi-level integrated information system

COMPETITIVE ADVANTAGES

Fully prepare universities for online learning with all process to be automated

Distribute the dormitory places in the most efficient way

ABITECH

ABOUT THE COMPANY

ABiTech LLP was founded in 2003 and provides professional IT services in many industrial sectors of the economy. One of the key activities of the company is the development and implementation of systems for digital management of assets and processes.

SERVICE DESCRIPTION

The software ASKOU (Automated System of Control and Operational Accounting) help enterprises to solve the tasks of improving business efficiency, traffic safety and control over the performance of service and maintenance works and repairs.

- ASCOU Maintnance and Repair: Automated planning of maintenance and repair of equipment, buildings and vehicles, execution control and operational accounting of works.
- ASCOU Inventorization: Provides inventory of commodity and material values, fixed assets and other assets at the Enterprise.
- **ASCOU Storage:** Accounting, inventory and address storage of inventory objects in the warehouse.
- **ASCOU Occupational Health and Safety:** The module allows you to register briefings.

COMPETITIVE ADVANTAGES

4th place in the TOP-10 Rating of Innovative Companies of Kazakhstan

35 IT champions of Kazakhstan. Team of skilled professionals with experience in the information technology market

Broad partnership with leading IT companies and suppliers from CIS countries and the world

PROMETEO

ABOUT THE COMPANY

Prometeo was founded in 2022.

Prometeo offers decentralized blockchain for everyone.

The decentralized network works for B2C applications, receives and processes data from all IoT systems without using an external cloud service.

SERVICE DESCRIPTION

- Ikarus is a platform for logistic management, IoT and digital documents on supply chain
- Ikarus is a new platform for managing IoT and digital supply chain records
- Our distributed network is specifically built for industrial and non-industrial applications that require digital sensors, IoT systems, digital documents, and GPS Trackers
- Ikarus enables you to save your data, encrypt it, and guarantee the origin and honesty. We provide a reliable network that defends the hacker assaults and shares updates with all players.

prometeo

chain system

COMPETITIVE ADVANTAGES

A tight and highly secure permissions system are in place

Ikarus allows you to share any form of data (GPS positioning, IoT data, and documents attached)

Saves 315 hours on paper document review by one employee over 1 year, reduces the risk of data loss by 89% and optimizes costs by 43%

ABOUT THE COMPANY

The Kazakh company "Edil-Oral.kz" LLP was founded in 2009 and carries out its activities in the Republic in full compliance with the requirements of national and international standards and regulations. Production divisions of the Company-Service Enterprise for the repair of explosion-proof equipment, as well as a department for inspection and technical certification of explosion-proof equipment

SERVICE DESCRIPTION

TRAINING - certification of personnel

INSPECTIONS - technical maintenance and technical examination of electrical and instrumentation and explosionproof equipment, valves, pumps, heat exchangers.

SERVICE CENTER - carrying out routine maintenance and major repairs of electrical, instrumentation and equipment, electric motors (including high-voltage), valves, pumps, heat exchangers;

CONSULTING – a full range of engineering support, development of technical solutions for modernization and optimization of production by company experts with international and national accreditation.

More than 12.000

certified workers

international standards ISO9001:2015.ISO14001:2015

TARGETAL

ABOUT THE COMPANY

Smart video surveillance from TargetAI allows you to analyze video data using artificial intelligence, big data processing and cloud computing technologies. They connect any type of cameras, integrate with any devices/sensors and interact with other security systems.

SERVICE DESCRIPTION

Combine the cameras: combine any video surveillance cameras into a single interface, regardless of the type of camera (IP/analog) and the manufacturer.

Setting up the VMS: provide advanced camera viewing and control functionality with built-in service analytics and mapping service options.

Connecting artificial intelligence: train a neural network for object/face/number recognition, event type detection or non-standard analytics for business tasks on existing Client cameras.

Turning video into valuable data: visualize analytics in any format (dashboards/charts/reports) and integrate with the Client's information systems via API.

Prices are From 17000 tenge (~35\$) – 21 500 (~45) per month for 1 camera

COMPETITIVE ADVANTAGES

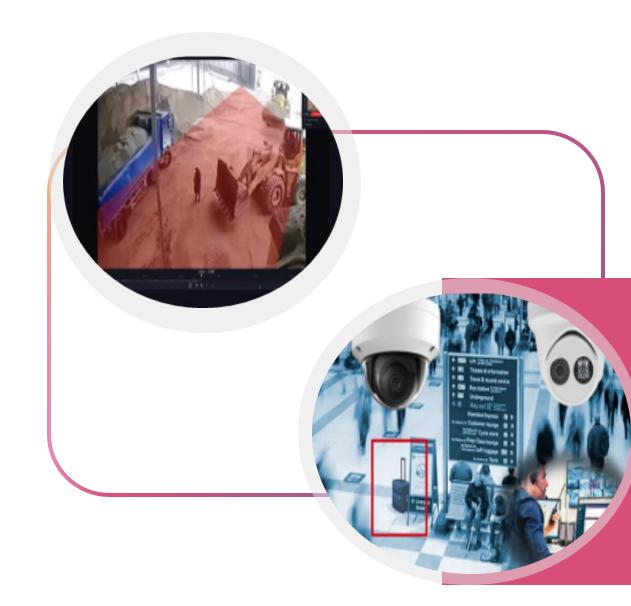

System works with 95% of cameras regardless of the connection type and camera manufacturer.

System provides the possibility of secure output of CCTV cameras to the cloud to access them from anywhere in the world.

In accordance with international standards ISO 15408 OUD 4, ISO 9001:2015

iikõ

ABOUT THE COMPANY

Kwaaka is a truly Kazakhstani product, created by professionals in the field of IT development, HoReCa, and marketing. Kazakh guys strive to build a global product that thousands of restaurants and various q-commerce industries need.

SERVICE DESCRIPTION

Accept all orders from aggregators in your POS system without interrupting them manually

STEP1: We connect your POS and delivery services We take care of the setup process by integrating all your existing online and third-party sales channels (Glovo, Wolt, Choco Food and many more) to your account.

STEP2: Track your online orders from your POS We provide strong two-way integration by sending all your online orders to your POS so that you dont have to interrupt them manually

STEP3: Stay connected to your kitchen Orders automatically sent directly to the kitchen and printed in one standard size, speeding up workflow and reducing preparation time.

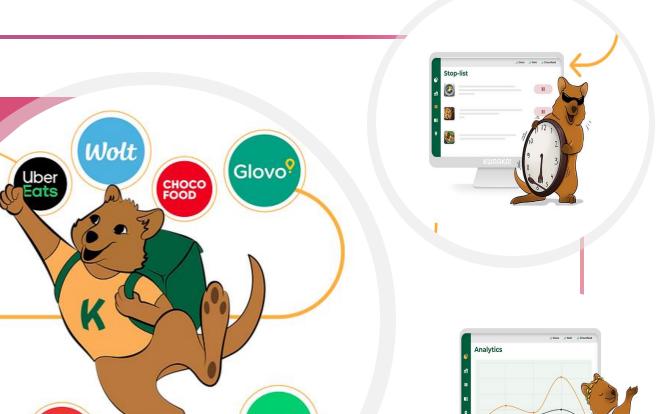

Prices are From 15,000 tenge (~31,5\$) for 1 integration with one aggregator. (€

COMPETITIVE ADVANTAGES

Integrations with leading services in the restaurant business. Company works in all cities of Kazakhstan and abroad. The integration process takes place online, so they can automate your delivery processes, wherever your establishment is.

iometric verification

Reduces fraud and scams by 87% with the power of Al

System provides the possibility of secure output of CCTV cameras to the cloud to access them from anywhere in the world.

AEROSPACE ENGINEERING

ABOUT THE COMPANY

The Aerospace Engineering company was founded in 2016, initially setting a course for the maintenance of radio navigation equipment in Kazakhstan. The main activity is the implementation of projects for the supply and maintenance of equipment in the areas of: aerospace, space industry, ground transport, digital identification and security, defense and security

SERVICE DESCRIPTION

SERVICE MAINTENANCE

Comprehensive check of technical condition and adjustment of equipment parameters. Testing, replacement of defective components that are parts of the Equipment.

SYSTEMS UPGRADES

Perimeter control systems. Air and ground transport control systems.

CONSULTING SERVICES

Providing consulting services in the space industry.

TRAINING SERVICES

Basic courses for training operators in using X-ray television installations (RTU) for security services of airports, railway stations, etc.

COMPETITIVE ADVANTAGES

The company uses the latest technologies.

The company provides high-quality services in the field of aerospace, air navigation and transport activities.

SAURIDA Oil&Gas

SAURIDA OIL&GAS

ABOUT THE COMPANY

Supplier of light petroleum products. Safe and timely fuel supply from the leading oil refineries in Kazakhstan and Russia: Atyrau Oil Refinery LLP, Pavlodar Petrochemical Plant LLP, PetroKazakhstan Oil Products LLP, TAIF-NK JSC, TANECO JSC and Gazprom Neftekhim Salavat LLC.

SERVICE DESCRIPTION

- "Saurida Oil & Gas "LLP is a company in the field of supplies of light petroleum products with 100% Kazakh content, which operates in the territory of the Republic of Kazakhstan. Company has been supplying high quality light petroleum products for more than 10 years.
 - They supply products at the time required by the customer and in accordance with the rules and laws of the Republic of Kazakhstan.
 - Also, to obtain quality products, company cooperates with independent experts in the field of quality and complies with the quality standards of GOST RK, RF and the technical regulations of the EAEU.

COMPETITIVE ADVANTAGES

Company conducts effective management to minimize risks that can negatively affect the environment.

All our employees, including the company's management, undergo regular professional development.

In accordance with international standards ISO 45001, ISO14001

SMART DIGITAL DEVELOPMENT

ABOUT THE COMPANY

Smart Digital Development company provides IT services (more than 50) for Kazakhstan, Russia, Kyrgyzstan and Uzbekistan for business digitalization. Such as: websites, CRM, consulting and design.

SERVICE DESCRIPTION

Smart Digital Agency

Company create vibrant and effective digital marketing for businesses. They provide services in the following fields:

- Design (Web design, UI/UX, Graphic design, 3D design, Printing)
- Social Media Marketing (SMM) and Social Engine Reputation Management (SERM)
- Video and photo production
- Advertising and promotion
- **Marketing and consulting** (Marketing strategies, Advertising strategies, IT solutions in the field of promotion and sales)
- Corporate style (Naming, Logo, Brand Book)

COMPETITIVE ADVANTAGES

The comprehensive solution provided by the company helps to increase sales of goods and services and ensures the introduction of digital technologies.

Smart Digital creates a basis for accounting and customer service, which ensures a high level of satisfaction.

DAITAN

Daitan, founded in 2016, specializes in the digital transformation of production processes of large industrial enterprises within the framework of HSE areas. It has in its portfolio exclusive rights to technologies and software, a wide range of advanced solutions and equipment.

SERVICE DESCRIPTION

- Digitalization of processes in the field of labor protection allows to ensure safety in the workplace
 - Automation of industrial safety control, risk and incident management
- Industrial safety in the management of contracting organizations
 - Digitalization of business processes for production safety
 - Automated information system for environmental monitoring
 - The most in-depth video analytics system detects violations
