Egypt..... Massive Opportunities for Lighting Technology Makers

Egypt's construction sector shows no signs of slowing down with 1,400 active construction projects worth \$348.2bn currently underway in the country.

Over 68% of the 1,400 projects, worth a collective \$142 billion, are in the advanced stages of development, while an estimated \$178.4 billion worth of projects are in the early stages.

Smart cities are becoming a fixture of Egypt's infrastructure development strategy: In the coming years, the Egyptian government plans to introduce 15 new smart cities across the country as part of its long-term infrastructure development strategy. Smart cities, also referred to as fourth-generation cities, attract 30 million residents.

The most significant smart city is The New Administrative Capital, planned to house key public institutions, including the Parliament, and will span 700 sq km, with the capacity to house some 5m people by 2050.

The smart "New Capital" is planned to consist of 21 residential districts and 25 dedicated districts, about 2,000 educational institutions, towers, skyscrapers, 663 hospitals and clinics, 1,250 mosques and churches, 40000 hotel rooms, and an international airport.

Demand on lighting systems in the Egyptian market is expected to rise at 19% annually within the coming 5 years; while The Egyptian LED lighting market size reached US\$ 427.4 Million in 2022. Looking forward, the market is expected to hit US\$ 553.4 Million by 2028, exhibiting a growth rate (CAGR) of 4.3% during 2023-2028.

The Egyptian government announced plans to establish three industrial cities and 17 complexes for small industries; covering 15 governorates; accommodating 5046 industrial units.

Indeed, Egypt is on its way to becoming the major regional industrial and commercial hub with great propensity to provide all the essential ingredients for the world's top lighting technologies brands to supply the mushrooming mega commercial activities and logistical zones taking place around the new Suez canal and in many other spots.

Middle East Lighting Expo..... Mega Export Opportunities

Responding the glimmering massive market place opportunities within Egypt and the MENA region's construction and projects sector; Middle East Lighting Expo is undoubtedly the most efficient sourcing event for Lighting Technologies & Products

Celebrating its 6th anniversary ; Middle East Lighting Expo continues to achieve supremacy; as a quality forum introducing the most advanced lighting technologies to the well-off markets of Egypt and its neighboring states.

Middle East Lighting Expo indeed is the premium industrial trade exhibition serving Egypt's and the MENA region's booming lighting sector; with high levels of competence and dynamism distinguishing it from other trade shows in the region.

Thanks to its exclusive conceptions, Middle East Lighting Expo outlines the major tendencies; solutions and advancements presented by the world's prominent and brightest technology makers within the lighting industry offering non-stop inputs and all-inclusive applications to entrepreneurs, service providers, quality buyers and trade visitors from Egypt and the entire MENA region.

Granting exhibitors 360-degree chances to break into one of the world's most attracting profit-zones; Middle East Lighting Expo is the most influential trade event; that is anticipated to spectacularly engender mega business deals worth millions of dollars all under one roof; thus allowing exhibitors to achieve the best return on their investment.

Creating a crystal-clear business path for international, regional and local corporations to be on the leading edge; Middle East Lighting Expo directs technology makers to source and access exceptional exports, sales and distribution channels within Egypt and the entire MENA region.
